

## The Advocates Mentoring Advocates Training Program on Breast Cancer and the Environment

### Demographics and Study Statistics

Based on 121 responses from women and men attending programs at eight sites, changes in knowledge from pre- to post- presentation were significant. Participants performed significantly better on the post-test (**mean score 76.98±17.30%**) compared with the baseline pre-test (**mean score 62.65±17.83%; p<0.001**).
